

AIRTRAIN NEWARK REPLACEMENT PROGRAM – SYSTEM TECHNOLOGY PROCUREMENT
RFQ NO.6000001266 - REQUEST FOR INFORMATION
DATE: 01/3/2023

RFI #	RFP Document	Section Reference	Question/Request for Clarification	Port Authority Response
1	RFQ	N/A	We would like to request the Port Authority to inform the budget or affordability target for this procurement. As the SOQ submission deadline is approaching soon, your earliest disclosure of this information is appreciated.	The Port Authority will provide an estimated design and construction cost range in the Request for Proposals.
2	RFQ	Appendix B, Section 7	Please confirm our understanding, that in the SOQ we only have to name the dedicated Project Manager foreseen for the System Technology Project.	The Project Manager is the only Key Personnel position required to be identified and supporting documentation provided for in this SOQ.
3	RFQ	Appendix B, Section 3	Please confirm what professional licenses are expected from the Key Personnel, in this case for the Project Manager? Especially our project management personnel, best suited for such APM projects not necessarily have professional licenses from the state of New Jersey?	The Project Manager does not require a Professional License, however Section 3 provides a location to provide the license if the Project Manager possesses one.
4	RFQ	N/A	Given that some of the candidate transit technologies may require smaller, lighter guideway structures than other technologies, does the Port Authority intend to take the potential advantages of such smaller structures into consideration in the vehicle and system supplier selection process?	The Port Authority will not be evaluating the structure or fixed facility impacts due to the system technology as a part of the RFQ evaluation process. The Port Authority will provide its final evaluation criteria with the RFP
